## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 11, drawn to a ball grid array package, classified in class 257, subclass 704.
- II. Claims 12 to 22, drawn to a method of forming a ball grid array package, classified in class 438, subclass 15+.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of dispensing a first dose of an epoxy encapsulant material within the retailed ring and then curing it and then attaching the metal cap and then filling with a second dose of an epoxy encapsulant material, it can be performed by filling the area through the metal cap.
